WHAT IS **BADBIRDY** **EGGSTREME**

BadBirdy Eggstreme – The ultimate reflective bird deterrent. The **Eggstreme** features a high-gloss, chrome-plated finish that spins and sways in the wind, creating unpredictable flashes of light that effectively scare birds away. Designed for durability, it is weather-resistant and easy to install on fences, rooftops, gardens, and commercial spaces. Keep your property bird-free with a safe, eco-friendly solution.

STARLING

AND MORE

- BadBirdy will not completely eliminate bird infestations.
- BadBirdy will deter between 60 and 70% of pest birds.
- BadBirdy will not be effective if it is not installed in direct sunlight.
- BadBirdy will not deter roosting birds as they do not nest close to sunlight.
- BadBirdy will not deter nesting birds (they will protect their younglings at all costs).
- BadBirdy will not deter large colonies of gull birds which are already settled.

WARNING

FREQUENTLY ASKED QUESTIONS

01

- Q** Will the unit work when there is no sunshine?
A The unit will only reflect if the sun is shining.

03

- Q** How long will the unit be effective?
A The BadBirdy needs to be cleaned once every 4 months to ensure maximum effectiveness. The unit does come with a 3 year warranty (Ts and Cs apply).

05

- Q** How effective is the BadBirdy?
A On average the BadBirdy will get rid of between 60 – 70% of birds within a 3 – 4 meter radius.

02

- Q** Do birds become familiar with the device after a while?
A As long as the flashes are visible, birds will not get used to the device. This is because the most sensitive part of the bird is their eyes. They will look for blind spots where the flashes are not visible.

04

- Q** Will the BadBirdy scare away all birds?
A No. There are many birds that can be very stubborn and refuse to move from their nesting spots. We focus on reducing bird infestations. If you want to completely get rid of birds you will need to make use of a combination of bird control products.
