WHAT IS BADBIRDY STICK ON

The **BadBirdy Stick-On** is designed to fit on top of a turbine ventilator. The inconsistent rotating action of the roof turbine ventilator and the unique "stealthlike" design of the BadBirdy Stick on cause reflection of sunlight at various angles and speeds. This action irritates birds in close range, resulting in scaring off unwanted birds effectively..

STARLING

AND MORE

- BadBirdy will not completely eliminate bird infestations.
- BadBirdy will deter between 60 and 70% of pest birds.
- BadBirdy will not be effective if it is not installed in direct sunlight.
- BadBirdy will not deter roosting birds as they do not nest close to sunlight.
- BadBirdy will not deter nesting birds (they will protect their younglings at all costs).
- BadBirdy will not deter large colonies of gull birds which are already settled.

EASY ATTACH

The device attaches to the turbine ventilator in 3 simple and straightforward steps.

NO BLIND SPOTS

Rotating 360° with more than 20 reflective angles. Without any blind spots. Drive away birds effectively.

BIRD REPELLENT RANGE

The coverage area of a bird repellent is about a 8-meter radius. Open and ventilated places have better effects.
